

CIAT WENT LIVE EARLIER THAN EXPECTED WITH GCON4

CIAT works in collaboration with hundreds of partners to help developing countries make farming more competitive, profitable, and resilient through smarter, more sustainable natural resource management. We help policymakers, scientists, and farmers respond to some of the most pressing challenges of our time, including food insecurity and malnutrition, climate change, and environmental degradation.

Our global research contributes to several of the United Nations' Sustainable Development Goals, and cuts across four key themes: big data, climate-smart agriculture, ecosystem action, and sustainable food systems.

THE EXPERIENCE

“I want to state that the company GCON4 implemented the ERP Unit4 Business World software at CIAT (International Center for Tropical Agriculture) with headquarters in Cali, between the months of July and December 2014. **The implementation was a complete success** and the results were complied with the demands and requirements established in the scope of the implementation signed with GCON4.

Within the consortium to which CIAT belongs, it was planned to be the ninth one going live. Thanks to the support of GCON4, **CIAT had managed to be the 4th one which went live.** This is due to the commitment given by the consultants, who had **often gone the extra mile**, thoroughly understanding CIAT processes and their process owners.

As a Project Manager of CIAT for the implementation of ERP Unit4 Business World, I can emphasize that the services offered had been highly professional. **GCON4 is currently among our trusted suppliers.”**
