

EPM Foundation at the forefront of technology

The EPM Foundation goes live with Unit4 Business World ERP software, through the expert guidance of **GCON4 Colombia**, UNIT4 ERP software distributor for Latin America.

In 2017, the EPM Foundation acquired UNIT4 BUSINESS WORLD ERP software, to optimize and integrate all its processes in a single information system hosted in the cloud.

The ERP is focused on the sectors of companies that are constantly changing and evolving. These include Non-profit Organizations, NGOs, Foundations, Research Centers, Universities and Service Companies, all of whom require the most advanced software that is flexible enough to adapt to the dynamic challenges of today's technological demands.

The implementation of GCON4 Colombia was carried out **without coding or any additional development of the product, thanks largely to the flexibility of the tool**, which is designed to facilitate future software updates and minimize future maintenance costs.

CLAUDIA GÓMEZ RODRÍGUEZ
Director Executive of the EPM Foundation

"Since the beginning of the millennium in the year 2000, the EPM Foundation has started to walk a wonderfully exciting path, allowing us to improve the quality of life in the people-orientated business communities that we represent.

Parallel and in response to the demands of the market, it was deemed necessary to embed an Information Management System, that would allow us to implement elements and inputs for decision-making at an administrative level.

Today, after its implementation, we are beginning to travel that higher road, where we can now count on more optimal processes in providing a system that allows us to focus more upon our core mission and less on the operative side of the business. Our processes become more flexible, enabling our reports and inquiries to follow suit. Our information is now more secured, protecting ourselves and stakeholders against potential fraud issues. Communication with our customers is paramount. We are now able to deliver real time information to institutions that require first hand information quickly."

Implementation team of the Unit4 Business World solution at the EPM Foundation.

"From the beginning, we have established our ideals to provide our every commitment to help the Foundation in its process of technological transformation".

Jessika Caro
Commercial Director
GCON4 Colombia

"The EPM Foundation has all our willingness and support to continue growing together in strategic partnership".

Luis Alberto Viñas
VP Sales
GCON4 Group

"The success of our implementations and the confidence of our customers are the basis and essence of GCON4"

Albert Palma
CEO
GCON4 Group

UNIT4 - Unit4 is a leading provider of Business Software for service organizations who are people-centered. With annual revenues of more than 500 million euros and more than 4,000 professionals worldwide, Unit4 offers ERP Solutions and Business Applications to the market, designed to meet the needs of specific vertical markets and help customers to facilitate changes in a simple way, by offering fast and client-focused profitable technological solutions. Thousands of organizations from various sectors, including Professional Services, Education, Public Services, Non-Profit Organizations, Real Estate, Distribution and Financial Services have all benefited from our ERP software solutions. At Unit4, we are in business for people.

GCON4 - As a diverse and multidisciplinary organization with a novel business model focused on projects, GCON4 has established itself as an international consulting company that offers exceptional global services. Our consulting teams have extensive international experience in Unit4 Business World implementation projects. We offer the maximum commitment for our clients within four lines of work: Software Distribution, Software Manufacturing, Implementation Services and Support.

Our company is an official Unit4 Partner for Latin America. In the project management, both UNIT4 and GCON4 have jointly collaborated to establish themselves as a manufacturer and specialized implementation partner, that allows itself to take advantage of a vast array of combinations and synergies, to ultimately provide the best ERP software technology implementation and support.
