GCON4 MFL

Survey Respondent

Paula McKeown,
Managing Director
HR/Payroll

What challenges were you facing BEFORE using GCON4 MFL?

- Loading data was a challenge with several different tools having to be used and also having to use SQL scripts for direct loading of data such as positions with no validation.

What benefits did you gain AFTER using GCON4 MFL?

- Much easier to load and reload data during testing, and move data from one environment to another. Values are prechecked and errors or warnings highlighted before loading, so load errors are reduced.

"I will always recommend that customers I work with purchase GCON4 MFL to ease their data migration during and after implementation. Many customers who initially purchase for the implementation keep the product post deployment as they find the tool very useful."

Paula McKeown,
Managing Director HR/Payroll, QTC
