ABOUT GCON4 FINANCIAL LOCALIZATION

GCON4, the ISO 27001-certified, Unit4 Partner for Latin America and Spain, offers Unit4 ERP implementation services with their corresponding tax localization for international clients who wish to expand their Unit4 ERP to their subsidiaries in LATAM.

Our experienced Unit4 ERP consulting team, who lives and speaks the local language, is familiar with the local culture, and possesses rich knowledge and implementation experience in this region. You are in good hands if you consult GCON4 for Unit4 ERP localization/implementation for Latin America. Our partners and customers speak and testify for us.

BENEFITS

Integration

The tax localization module is integrated with the entire finance module, so any transaction entered into the system will be reflected in the different reports.

Finance Control

In all organizations, it is necessary to have updated and timely control of finances at different levels such as cost centers or projects. The localization reports are hence designed so that users can perform such monitoring and make more accurate decisions.

Tax Compliance

Ability to generate the main tax reports to comply with the requirements of the law.

Flexibility

The tax localization is designed so that in the event of any tax change, reports or processes can be adapted without the need to restructure the entire module.

FEATURES

Financial Statements

Users can generate this report in excel format by entering the period or period range.

Trial Balance

Users can generate this report in excel format by entering the period or period range.

Sales & Purchase Reporting

With Tax Localization, users can generate tax reports according to the structure required by the country's legal entity.

Master files and FlexiGroups

Through the information master files, the required data can be captured to generate reports according to the requirements of each organization or country.
